Introduction	product scope	product value	Intended audience	Intended Use	General description	Essential features	Desirable features
It's a weather app designed for travellers and business travellers in particular.It uses satellite maps with voice and video.	*Actual weather *Weather in different regions *Meteorological chart *Satellite cloud picture *Prebaratic chart *Recommended clothes	1. Trevellers,especially bussiness travellers are major users of weather forecast products. Not only do weather disasters, such as hail and hurricane, have a huge impact and threat on their life, but even daily life, holiday arrangements, clothing, etc. also rely on weather forecast products. 2. Other private enterprises Other private enterprises can also adjust their demand and supply through weather forecast. For example, supermarkets can provide more drinks in hot weather.	travellers ,business travellers.	To judge whether the weather is suitable for going out or not. To decide to wear what kinds of clothes. To tell whether there is a need to bring an umbrella.	Enter your destination in the search field below and click search.The APP will then show the route and time to arrive at the destination, and you can choose to drive, walk, ride, travel by bus, take a taxi, etc., which is very convenient.	It can accurately forecast the weather for the next fifty days.Users only need to download the App to use it online with phone,no need to top up membership or pay any money.	It can reflect weather in a vivid way. When natural disasters happen,our app can send voice warning at once.
